

NEWS RELEASE

HUSKY INJECTION MOLDING JOINS RODAN'S 'GREEN' TEAM

Bolton, ON, Canada, April 23, 2008 – Husky Injection Molding Systems Ltd. celebrated Earth Day by committing to reduce electricity use through the EnerShift™ Demand Response (DR) Program. EnerShift™ is an energy management initiative implemented by Rodan Energy and Metering Solutions Inc. that is designed to provide large energy users the opportunity to secure Ontario's electricity supply and reduce their environmental footprint. For Husky this will mean reducing its power usage in order to assist when provincial electricity demand exceeds supply. To accommodate this reduction, Husky will temporarily reduce its electricity consumption for non-essential activities.

Rodan's EnerShift program engages businesses to curtail electricity use during high power demand when the province's electricity system is strained. DR provides a clean alternative to bringing additional generation resources online to meet peak demand which is no more than a hundred hours a year. By minimizing the need for additional generation to meet Ontario's growing demand, DR participants are helping to phase-out Ontario's coal-power generation plants.

"The EnerShift program fits perfectly with our commitment to environmental responsibility," commented John Galt, Husky's President and CEO. "Incorporating electricity demand management strategies into everyday operations through the EnerShift program is good for business, the environment and our community and we are pleased to be participating."

"Demand Response is quickly emerging as a green energy resource that not only produces environmental benefits but also serves to enhance economic growth in our communities," said Paul Grod, President & CEO of Rodan Energy. "By committing to reduce electricity use when the power supply is constrained, Husky is helping to prevent blackouts which have negative impacts on all businesses in the area."

About Husky

Husky Injection Molding Systems Ltd. (www.husky.ca) is a leading global supplier of injection molding equipment and services to the plastics industry. The company has more than 40 service and sales offices, supporting customers in over 100 countries. Husky's manufacturing facilities are located in Canada, the United States, Luxembourg and China.

About Rodan

Rodan Energy and Metering Solutions Inc. is a leading metering and energy management solution provider. Combining its expertise in metering, data management and demand response, Rodan is enhancing grid reliability and price responsiveness in Ontario's electricity sector.
