### **OPA SELECTS RODAN AS DISPATCH ADMINISTRATOR FOR THE PEAKSAVER RESIDENTIAL DEMAND RESPONSE PROGRAM**

Mississauga, ON, Canada, May 29<sup>th</sup>, 2009 - Ontario Power Authority has selected Rodan Energy as the dispatch administrator for peaksaver<sup>®</sup>, a province-wide residential demand response program. Demand Response is a way to manage electricity demand in response to strain on Ontario's electricity supply system. By adjusting air conditioners and other residential electrical loads across the province, peaksaver<sup>®</sup> helps shift the demand.

"Rodan was selected to provide these services as they are already very familiar with the program due to their role as the Balance of Province Aggregation Operator and also because they have a demonstrated capability to start-up, contract and deliver results very quickly," commented Paul Shervill of the Ontario Power Authority.

"We are very pleased to add this offering to Rodan's comprehensive suite of demand management services," stated Paul Grod, CEO of Rodan Energy. "We look forward to continuing to support the OPA and Ontario's electrical utilities in delivering reliable conservation and demand management solutions to residential, industrial, commercial, and institutional energy consumers."
