

# DR3 - Revenue for your Gas Generator

## July 16, 2010

Presented by  
Ed Hsing, Director – Demand Response  
Rodan Energy Solutions Inc.

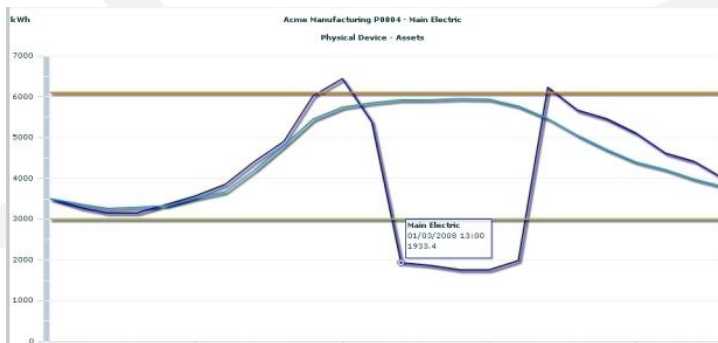

# What is Demand Response?

- Coordinated reduction of electrical demand to relieve a electricity constraints and high prices  
– *CHANGE IN HUMAN BEHAVIOUR*

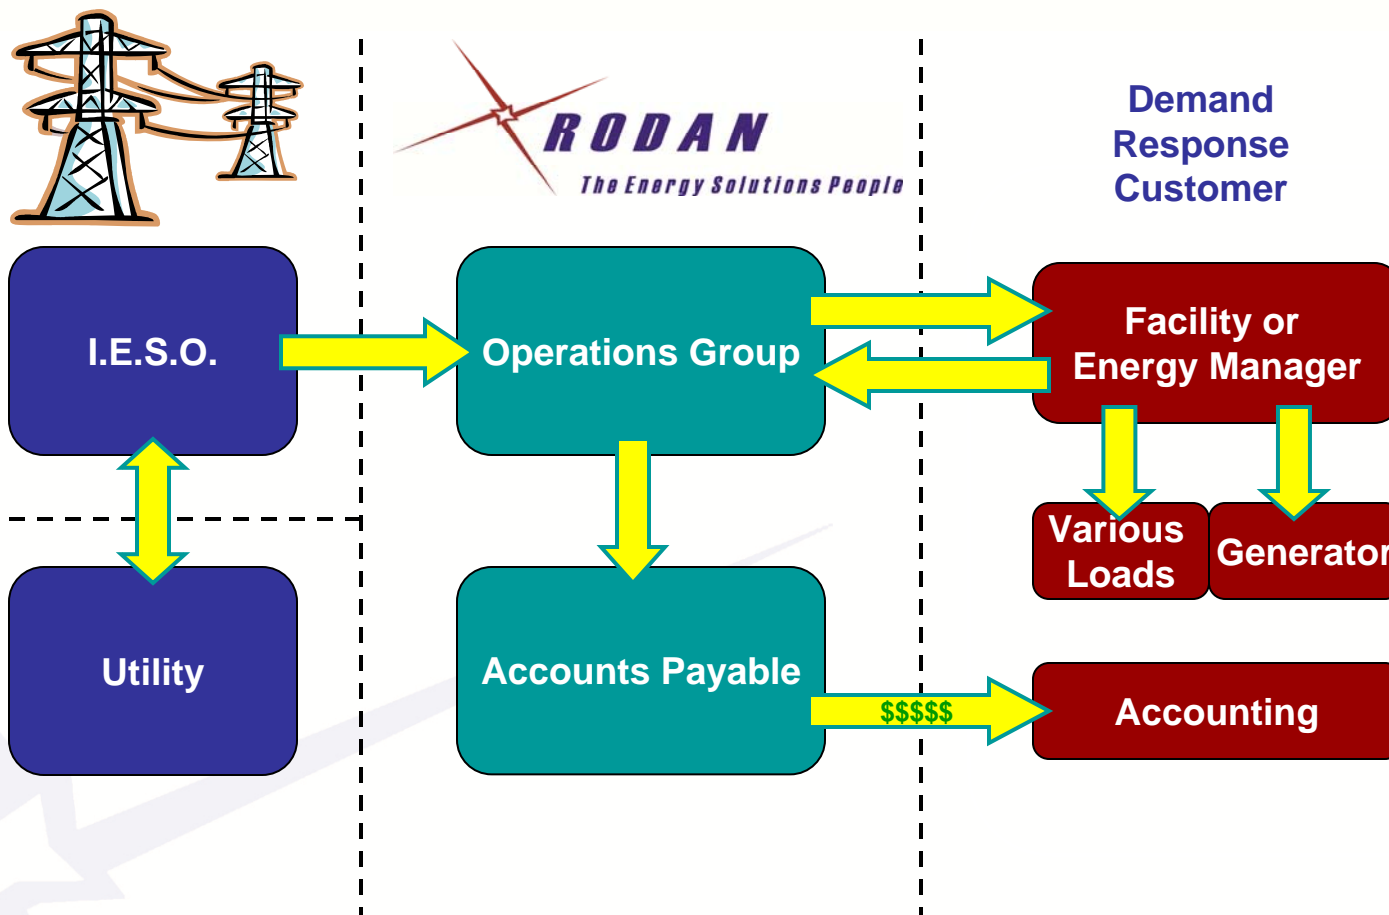

## What is DR3?

- A demand response program financed by the Ontario Power Authority
- Participants are paid to reduce electricity demand during high demand periods
- DR3 events are 4 hours long

# How does DR3 work?

# Benefits

---

- Money: ~\$120,000/MW/year
- Relieving Ontario's Electrical Grid
- Reducing the possibility of blackouts
- Assisting the implementation of green energy

# Other Considerations

---

- Certificate of Approval – Ministry of Environment
  - BAD: “emergency use”
    - Eliminating this term is usually good enough
  - GOOD: “peak shaving use”
- No substantial net generation
  - Transfer switch
